

## Prior authorization — Premium

Utilization management updates - January 1, 2020

There are some medications that have to be authorized by a doctor before you can get them, because the medications are approved or effective only for some conditions.

### Reviewing medications

A group of doctors and pharmacists meets often to review medications under pharmacy benefit plans. They also recommend prior authorization guidelines.

### Safe and effective

When making recommendations, the review committee focuses on medication safety, effectiveness and cost, including:

- U.S. Food and Drug Administration (FDA) approved uses
- Medication instruction labels
- Accepted or published clinical recommendations

In this drug list, brand-name medications are shown in UPPERCASE (for example, CLOBEX) and generic medications in lowercase (for example, clobetasol).

### Getting a short-term supply

If you must take a medication that requires prior authorization right away, there are two options that may work for you. First, ask your doctor if a sample is available. Or, check with your pharmacy to request a short-term supply of 5 days or less. Keep in mind, you will be responsible for the full cost at that time. If the prior authorization request is approved, then your pharmacist can fill the rest of your prescription.

### Requesting a prior authorization

You, your pharmacist or your doctor can start the prior authorization process by contacting us. We will work with your doctor to get the information needed for the review. Once we receive a finished prior authorization form from your doctor, we will conduct a review within a few days and send you and your doctor a letter regarding the decision.

## Premium non-specialty prior authorization list

These medications may require prior authorization based on your benefit plan. For more information, contact customer service at the phone number on your member ID card.
